Full Stack Software Engineer

Full Stack Software Engineer with 8+ years of experience building and maintaining distributed production systems. Strong background in backend development, event-driven architectures, and microservices, with experience across PHP, Perl, and Go. Proven track record of owning and evolving production systems end-to-end, including leading platform rewrites and delivering high-impact features. Open to fully remote opportunities.

Skills

Languages: PHP, Perl, JavaScript, Node.js, Go

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Docker, Kubernetes, Nomad

Search & Messaging: Solr, RabbitMQ, Gearman, Kafka, Debezium

Databases: MySQL, MongoDB, PostgreSQL

CI/CD: Jenkins, GitHub Actions, Argo CD, Sonarqube

Tools: Git, Vault, KeyCloak

Experience

Full Stack Software Engineer

Adzuna – Remote | Sept 2017 - Present

- Contributed to large-scale backend systems for job scraping, processing, and publishing within an event-driven architecture using RabbitMQ and Apache Solr
 - Worked across multiple teams and domains, quickly ramping up and contributing to diverse systems and features
 - Designed and implemented APIs to integrate Seiza (acquired company), enabling reliable interoperability between different technology stacks
 - Led development of Company Pages, a high-impact SEO feature that improved organic traffic and user engagement
 - Recently worked within a microservices architecture using Go, PostgreSQL, Kafka, and Debezium for event streaming and data pipelines
-

Full Stack Software Engineer

Work In Startups Ltd – Remote | Sept 2018 - Sept 2024

- Sole Software Engineer responsible for the end-to-end development and maintenance of the WorkinStartups platform for over 6 years
 - Owned the entire technology stack (frontend, backend, infrastructure), ensuring system reliability, performance, and continuous delivery
 - Led a full platform rewrite from Zend Framework to Laravel, significantly improving maintainability, scalability, and developer experience
 - Designed and implemented product features that improved user experience and modernized the platform
 - Maintained and optimized a live production system with real users, focusing on performance, stability, and code quality
-

Full Stack Software Engineer

Everis – Barcelona, Spain | Oct 2016 - April 2017

- Worked as a Software Analyst and Developer intern on a project for the European Commission, contributing to both front-end and back-end development
 - Developed applications using PHP (Zend Framework) and modern web technologies.
 - Collaborated within a multinational, cross-functional team of analysts, engineers, and testers in a large-scale enterprise environment
 - Gained valuable experience in international teamwork, software development processes, and delivering solutions within complex organizational structures
-

Education

BSc Computer Science and Informatics — University of Western Greece
